(54) Title: PAINT BRUSH HOLDER CONSISTING OF ONE PART

(57) Abstract: The present paint brush holder is for the purpose of resting a paint brush over a paint container, with the paint brush bristles suspended over the inner portion of the open paint container. The paint brush holder when attached to the rim of a paint container, allows the user to rest the paint brush in the paint brush holder and allows the principle of inertia of the paint brush, acting on two points (2, 6) to create a grip on the paint brush handle. Further points (1, 3, 5, 7) of the paint brush holder restrict lateral movement of the paint brush. The paint brush holder can be used with a variety of types and sizes of paint brush, and can be fitted to a variety of types and sizes of paint container, the paint brush holder being of spring content.

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 B44D3/12

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 B44D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ, WPI Data

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

Z document member of the same patent family
